

EVERY LIGHT IS A BEACON OF HOPE: SCOTT'S STORY

Imagine: 15,000 pixel lights, 3,000 feet of wire, and months of meticulous planning and preparation.

That's what goes into Scott Tonelli's annual Change 4 Change holiday light show fundraiser.

Inspired by his son's struggle with mental health — and the difficulty he faced accessing care — Scott started Change 4 Change in 2019, transforming his Arthur, Ont., home into a dazzling display of lights and music in an effort to shine the spotlight on children's mental health.

In five years, he's raised nearly \$40,000 for WRHN's child and adolescent inpatient (CAIP) mental health program, helping ensure other families don't have to experience what he went through.

LIGHT THE WAY TO HOPE AND HEALING

Your donation supports every patient's journey – across all WRHN's care areas – by funding priority equipment and advancing innovative care programs that can grow with our community. Visit wrhnf.ca/wishbook

- 01** Advanced ultrasound units • \$76,000
Allows clinicians to make quick, accurate assessments right at the bedside and helps guide critical decisions in real time.

- 02** ECG carts • \$30,000/ unit
An ECG – on wheels. ECGs record electrical activity to see how well a patient's heart is working. These mobile units can be moved around the hospital, so patients get their tests quickly and easily.

- 03** Temperature management system • \$22,000
Helps regulate body temperature by circulating warm or cool water through a specialized blanket. Used in many clinical situations, including preventing hypothermia during surgery.

- 04** NICU radiant warmer • \$89,000
This advanced hybrid incubator provides a controlled, thermally stable environment to support the most vulnerable newborns.

- 05** Linear accelerator • \$4.4M
Provides precision radiation treatment to affected areas while protecting surrounding healthy tissues.

- 06** Cardiac catheterization lab • \$10M
The cath lab is where heart issues – including active heart attacks – are diagnosed and treated daily. Building a third lab ensures our community continues to have access to timely, life-saving cardiac care.

- 07** Upgraded stretcher • \$12,500/ unit
A high-quality, adjustable hospital bed on wheels allows care teams to safely, securely, and quickly transport patients around the Hospital.

- 08** Patient beds • \$14,000/ unit
Upgrading hospital beds means giving patients a safer, more comfortable place to rest and recover.

Feel the glow of giving today.
